## *Managing Business*

**Managing Business gives you the skills to make far-sighted decisions between the conflicting priorities of market opportunities and company strengths. Strategic planning will lead you faster and safer to future success.**

Management is responsible for securing the future success and thus the long-term economic viability of an organization. This is a question of strategic conceptualization. Company-specific strategies can be defined only between the poles of strategy, structure, culture and processes. Besides the ability to manage complexity, knowledge of the influencing factors of financial power, organizational structure and company culture is absolutely essential. The quality of an organization's management is indicated by long-term results and successful strategy implementation. It is not the vision itself that is critical, but its realization and implementation. This seminar follows a consistent approach: to impart knowledge, concepts and tools which are already tried and tested and can be directly put into practice.
